

## Gravity Fed Porcelain Water Purifier

The Gravity-Fed Water Dispenser is made of porcelain and is easy to use, just pour water into the plastic reservoir and gravity does the rest.

The Gravity-Fed Water Dispenser uses a ceramic gravity filter, impregnated with silver, which prevents the growth of bacteria on the filter and doesn't need to be sterilized like other ceramic filters.

This Water Dispenser has a capacity of 8 litres with a filter flow rate of 1 litre per hour. The unit stands 17-11/16" (45cm) tall and a diameter of 9½" (24cm).

## Outdoor Ceramic Water Filter

Ideal for camping, hiking, hunting, back woods adventures and more. The Outdoor Ceramic Water Filter is wholly encased in a durable, snap sealed casing that fits smoothly into a camouflaged, nylon carrying case. The Outdoor Ceramic Water Filter transforms turbid water from rivers and lakes into germ-free drinking water. The nano silver fiber impregnated ceramic filter reduces contaminants as small as 0.2 micron.
