

## Bernoulli Shower Head

The first shower head specifically designed for use with a shower filter. Italian-influenced design employs the scientifically recognized Bernoulli principle of pressure changes in fluids at increasing flow rates. Building this principle into the Bernoulli allows a very strong water spray combining air and water without the needle-like feeling of other shower heads. Solid brass (6.7 oz) shower heads crafted by American workers in the United States. Fits all standard American plumbing. Conforms to U.S. Energy Policy Act - 2.5 GPM at 80 psi. First U.S. made fixed-action shower head introduced to the American market in over 20 years.

## Whedon Lo Flow Shower Head

High velocity aerating shower.  
Great rinsing force, even in low pressure.  
Made in the USA of solid brass, chrome plated.  
Satin nickel finish  
2.5 GPM Maximum flow rate at 80 psi.  
1.5" diameter nozzle, standard 1/2" female connection.  
Installs easily on any standard shower arm.

## The Shower Riser

The Shower Riser prevents head from banging on shower heads, but allows the shower head to swivel to a convenient position. Simple to install, this unique shower fixture enhancement is elegant in its appearance.

Raises Shower Filter/Head 5 to 6 inches.
