**Small Compact Design  
No Installation  
85dB Alarm  
Batteries Included  
UPC Bar Coded  
Trilingual  
(English, French & Spanish)**

The Water Alarm is a remote battery operated unit that can be placed anywhere in the house. The alarm sounds when the sensors come in to contact with water. The 85 dB buzzer will alert you that there is a water leak. Early detection will help to protect your home and possessions against damage from water and mold.

For maximum protection place units near the: water heater, dishwasher, washing machine, sinks, refrigerator, water filtration system, toilets, water softener, basement drain and sump pump. Anywhere a pressurized supply hose or pipe might leak, freeze or break.
