Whole House UV System

With Bypass Filter

Ultraviolet (UV) light systems protect you and your family from waterborne, disease causing, microorganisms without the use of chemicals.

With this Filtration System:

- The disinfecting results are immediate
- It does not produce any of the disinfecting by-products that chemical disinfectants may cause
- Unlike chemical disinfecting, UV has no detrimental effect on taste, odour, or pH of water
- They are easy to install and maintain
- Chlorine resistant Protozoa such as cryptosporidium and giardia are inactivated with UV light
- It is environmentally friendly
